

The killing of a witch is a simple task. The witch possesses powers similar to other Creatures of Night, but unlike some, such as the vampyre, she is absent of the power of un-death. Born a mortal, she may die as all flesh does. The dispatching of a witch must be undertaken by several able-bodied men, and it must be done with the utmost caution. But beware! Should these men prove Cowards and leave her half from death in order to spare their Conscience, the act may not be accomplished and the witch may return again.

These willing servants of evil are witches. They are evil's eyes and hands on Earth, and their only purpose is to make their horrible will manifest. Do not permit this heresy to take root!

It is not known the source from which the witch's power flows, but it is our suspicion that she seeks to harm the purest among us, such as children and virtuous maidens. As with other servants of evil, it is likely she desires little more than to destroy all that is innocent, and she shall succeed in her labors until the Good and Righteous subdue her.

The signs of a witch may be hidden or readily apparent. The cursed one may be fluent in torrid and unnatural tongues, speaking words that only evil may understand. The witch is also endowed with the power of sight: knowledge gained so that she may use the thoughts of her victims in her malfeasance.

Noctambulation may be another tell-tale sign of witchcraft; this is evidence that the forces of Darkness call to the witch in her sleep and make her walk the night with other corrupted Creatures. One who has become a witch may also show signs of a faltering memory of a degree more severe than in the aged or those who have suffered a blow upon the head. But simply because a witch may not recall her deeds, she is no less an instrument of evil.

The surest proof of a witch is this: the sudden appearance of a blot or blemish upon the skin, known as her Mark. Some say these marked witches have displayed a strange elongation to the limbs, in a likeness of their horrid brethren who were slain upon the rack.
